Special to The Tribune. RUTTE, Mont., Aug. 21-In the contest this afternoon there was little life. Beyond the fact that the miners had the heavy end of the score, there was not much in the exhibition to thrill the sportmuch in the exhibition to thrill the sporting blood. Sait Lake, owing to the absence of Elders Weed and Bluth, put up a weini line-up. Max Muller was on third, Forsythe and Tozer, who are billed as pitchers, were stationed in the outfield. The shattered aggregation was no match for the home team. Pandelin did the twirling for Wilmot's boarders and had it on the Elders at every stage, and though ten hits were secured off him, they were too well scattered to be effective. One of Sait Lake's runs was a gift. Three double plays abruptly squelched all hopes the Mormons had formed of scoring in three different innings. Two three-sackers and a single were jotted down to Huber's credit during the contest. The hits off Essick came in bunches. The score: BUTTE

London Man Murdered, Robbed and Placed on Railroad Track.

RAWLINS, Wyo., Aug. 22.-William T. McGinnis of Lander, Wyo., has been found dead on the railroad at Bidge. His head had been severed from the body by the train. From indications o the authorities entertain the theory that the man was murdered and robbed before the decapitation occurred, the body being so placed that the first train would cut off the head. McGinnis had relatives in Chicago and had announced his intention of going to that city b fore leaving Lander.

Salt Lake Route Decides to Make Place Division Headquarters.

Artificial Ice Plant, Large Round House and Dwellings Included in Improvements to Cost \$200,000.

While there has been much speculation as to the location of the district terminal of the Sait Lake Route, the matter was settled when the directors went over the ground recently, and now it is announced officially that Callente will be the permanent terminal

Heretofore Los Vegas and Monpa have been mentioned, but although they are nearer in the center of the system other conditions make Callente a more desirable spot. It has a good water service, and is at the point where the line will branch off to Ploche.

Following this determination the company will at once appropriate the sum of \$200,000 for permanent structures at Callente. This will be the first heavy appropriation yet made by the company for permanent structures on this end of the line. The news will be interesting to all at

Callente, as there has been a feeling that the terminal might be moved to some other point. Now that the matter is settled, however, the town will take on renewed activity and will in time beome the leading place in Lincoln

come the leading place in Lincoln county, Nev.

The Sait Lake Route has aiready shown the people of California what substantial structures it is going to put up along the road, and now the people of Nevada will have the opportunity of witnessing similar work in this neighborhood.

The appropriation will include the cost of twelve dwellings, a seventeen-stall roundhouse, a very fine station building, a standard 70,000-gallon tank, oil house, seventy-foot tuntable and numerous other structures.

numerous other structures.

An interesting feature of the plan is the artificial ice plant, which will be one of the buildings at Caliente. This will be used for the purpose of making ice daily to supply all the offices and passenger cars, as well as the icing of the fruit trains that will pass this way. The latter alone means many tons daily. The inter alone means many tons daily, and as natural lee would have to be hauled a long way and would not last long in that hot region, the plan of creeting an artificial plant has been suggested as the only solution.

## TOM BAIRD HURT.

Popular Engineer in Accident on Salt Lake Route. T. M. Baird, the popular young civil

ing corps, and before that with the Short Line, now with the Salt Lake Route, met with an accident at the Stockton dyke yesterday. He was with some others on the motor car used by roadway officials, and as it went over a plank grade crossing a wheel was struck by a boulder, throwing the car off the track, and in the melee Mr. Baird sustained a severe fracture of the g, one of the bones being broken. Torn clothing was the only lose sustained by others on the car, Mr. Baird was taken to Toocle and his wounded leg attended to. He was brought into the city last evening.

## WORK IS RUSHING.

North Salt Lake Plant Is Making Good Progress.

Out at North Salt Lake the ballast cars are being unloaded daily, and the marsh seems to be disappearing under the weight of earth. A pile driver and crew is at work on the foundation for the big roundhouse, some 200 piles hav-ing already been driven. These are in place under the lines where the tracks will be, and next week the concrete gang will commence work on the foundation. A surveying party is at work laying out the sidings, and altogether the place is now the scene of great ac-

tivity.

An official investigation yesterday, for storing the cement leaks. When the coof is on, however, this defect may be overcome, but until guch time official inspections of the work will be deferred.

Nelson and Herritan box in the afternoon and I box the same day. Well, I bear Mose on the 15th, but some of his friends hollered at the deciation, although it was on the square. I got what I deserved I put him down for the count of nine in the first round and help my lead all the time excepting in the seventh and eighth rounds. As I only had four days of training not wind wasn't the best and I hope the Salt Lake people will appreciate my buing able to box in faster company than I, myself, had expected. If they will only lock at the Eutle papers they will see that Jerry serves the puglistic stuff on a platter with water cress around it. The go between Gardner and Jim Jeffords was a disappointment. Gardner was entirely too first and Jeffords could not have touched him with a whip. Gardner had the big fellow at his mercy all the time and his work won him a lot of Butte friends.
